

NINA DAVIES

Scan the QR code for further support and advice for adults on talking to children about cancer.

Nina Davies makes artworks that use fiction and imagination to help us see the world in new ways.

Nina has worked with Eve, Luke and Mel, three young people who are currently living with or beyond cancer, to create an artwork based on their experiences.

The Clatterbridge Cancer Centre Liverpool is a hospital in the city centre. It uses something called a digital twin. A digital twin is a computer version of a real building. It helps check everything is working properly inside the hospital.

Card 1:
NAME: Luna Odelle Otto
WORKPLACE: Institute of Internal Reasons
RESEARCH AREA: Lost ancient sites

Card 2:
NAME: Glio B. Godman
WORKPLACE: University of Anatomical Research
RESEARCH AREA: Myths and rituals

Card 3:
NAME: Anakin Orion
WORKPLACE: Lunar Extract Limited
RESEARCH AREA: Digital twin hacking

Through these fictional characters, the group imagined discovering the digital twin in a future where the hospital building no longer exists.

Can you think of an object you use everyday?

Imagine someone discovers the object hundreds of years in the future.

They have never seen it before and know nothing about it...

WHAT DO THEY THINK IT DOES?

WHO DO THEY THINK IT IS FOR?

TELL A STORY ABOUT WHAT THEY DO WITH IT NEXT...
